

Veer Narmad South Gujarat University, Surat.

Department of Information and Communication Technology

M.Sc. (Information and Communication Technology) Programme

Certificate

This is to certify that Ms. **Dhruvi Vavadiya** with Exam Seat Number: **09** and Enrollment Number: **R24110018000710049** has worked on her part time project work entitled **“STAFFILIO”** at **Wokontech IT Solution** as a partial fulfillment of the requirements for 2nd ***Semester - M.Sc. (Information and Communication Technology)***, during the academic Year 2024-2025.

Date : 16-06-2025

Place : Dept. of ICT, VNSGU, Surat.

Internal Project Guide
M.Sc.(I.C.T.) 2nd Semester

ACKNOWLEDGEMENT

It is essential to acknowledge and express gratitude to everyone whose support and guidance have been invaluable. Completing such a comprehensive project would not have been possible without the collective efforts of many individuals.

Success in endeavors like this is never a solo achievement. It is the result of teamwork that steers the journey toward its destination.

We extend our heartfelt thanks to all the esteemed individuals whose contributions and encouragement have made this project an enriching and successful experience.

We would like to take opportunity to thank our **Department J.P. Dawer Institute of Information Science & Technology, Surat** for giving us this tremendous opportunity to work in the real-time project. We are deeply grateful to **Wokontech IT Solution** for providing us with this exceptional opportunity to work on a real-time project.

Our sincere thanks go to **Ms.Hiral Bhingradiya** , our professor and project coordinator, for her unwavering support and guidance throughout our academic journey. We are deeply indebted to them for their invaluable contributions.

Lastly, we would like to express our appreciation to everyone who has been a part of this project, whether their contributions were significant or small, direct or indirect. Your cooperation has been vital in bringing this system to fruition.

Thank you all.

Dhruvi M.Vavadiya

1. INTRODUCTION

1.1 COMPANY PROFILE

→ **Wokontech IT Solution**

- Wokontech IT Solution is a software outsourcing company that focuses on providing highly qualitative, timely delivered, and cost-effective offshore software development services to its clients. They are a top-ranked provider on ODESK, a popular third-party sourcing platform.

→ **Services Offered**

- Software Development Services
- E-Commerce Solutions
- Mobile Application Services

→ **Key Features**

- Stringent quality standards
- Flexible business practices
- Professionalism
- Affordable and all-inclusive custom development solutions
- Guaranteed quality of service

→ **About the Company**

- Wokontech IT Solution provides its employees with unlimited opportunities to grow financially and technically. The company offers a right mix of work, motivation, and recognition, making it a sought-after place to work. Regular trainings are also provided to employees to keep them updated with the latest technology and improve their net worth for the company.

Website :	http://wokontech.com/
Company Size :	11-50 employees
Headquarters :	Surat Uttran, Gujarat
Founded :	2012
Specialties :	Professional IT Service provider, .Net Application Development, E-Commerce Application Development, Mobile Application Development, and Custom Application Development.

2. Proposed System

- **HRMS** (Human Resource Management System) is a SaaS-based platform designed to optimize and digitize essential human resource processes for modern organizations. This cloud-enabled system offers a wide range of integrated features including leave management, employee attendance tracking, timesheet management, asset and inventory management, interview scheduling, and announcement management.
- By providing a centralized and user-friendly interface, HRMS simplifies HR operations, improves organizational transparency, and empowers both HR professionals and employees with real-time access and flexibility.

2.1 Scope

The scope of this project will be limited to the following:

- **Authentication & Access Control:** This component ensures secure login and controlled access to system features based on user roles. session handling to prevent unauthorized access.
- **Organization Management:** Handles all functions related to managing organization profiles within the system, including approval workflows, status updates, and administrative configurations.
- **Subscription & Package Management:** Manages the creation, customization, and assignment of subscription packages. This allows organizations to access features based on their selected pricing plans, supporting a scalable SaaS model.
- **Employee Management:** Enables organizations to store, update, and manage detailed employee records. This includes assigning departments, tracking profile information, and maintaining the organizational hierarchy.
- **Timesheet Management:** Allows employees to log their daily work hours by entering in-time, out-time, and break durations. It helps in calculating total working hours and maintaining attendance records accurately.
- **Leave Management:** Facilitates the process of applying for, approving, and tracking leave requests. It supports a transparent leave system where employees can view their leave balances and statuses.
- **Interview & Announcement Management:** Supports scheduling and managing interviews for recruitment, as well as publishing internal announcements such as events, birthdays, and organizational updates.
- **Document & Certificate Management:** Provides a centralized space to generate and manage essential HR documents such as NOC letters, internship certificates, and salary slips, which can be securely accessed or downloaded.
- **Add-on Purchase Functionality :** Track and manage purchases of additional admin/employee capacityMaintain upgrade logs and calculate charges dynamically.
- **Logs & Tracking:** Maintains detailed records of user login sessions and system activities to improve transparency, monitor usage, and support auditing and reporting needs.

2.2 Objective

- The primary objective of the **SaaS-based Human Resource Management System (HRMS)** is to fully automate and centralize the HR operations of an organization, reducing manual effort and enhancing operational efficiency. With the growing number of employees in modern enterprises and the increasing demand for organized HR processes, this system addresses the need for a smart, secure, and scalable solution.
- **Key objectives include:**
 - **Streamline Employee Data Management**
All employee-related information is maintained in a well-designed and secure database, which can be managed efficiently by the organization's Administrator.
 - **Centralized Control for Administrators**
Admins have full control over employee data, departmental structure, interview scheduling, asset issuance, rules configuration, salary slip generation, and more, from a single, user-friendly platform.
 - **Eliminate Paperwork**
The system contributes to a paperless work environment by digitizing all HR functions and providing digital access to documents like internship certificates, NOC letters, and handbooks.
 - **Digitize HR Operations**
To eliminate manual and paper-based processes by providing a centralized web-based platform for managing employees, roles, documents, and HR operations efficiently.
 - **Enable Subscription-Based Access**
To allow organizations to subscribe to predefined HRMS packages based on their requirements and budget—supporting Monthly, Quarterly, Half-Yearly, and Annual billing cycles.
 - **Support Role-Based Access Control**
To ensure that features and functionalities are accessible based on user roles (Super Admin, Organization Admin, Employee) and the permissions defined by the selected package.
 - **Facilitate Organizational Onboarding**
To enable organizations to register through an inquiry form, await Super Admin approval, and activate their accounts securely with unique database and login credentials.
 - **Allow Capacity Upgrades Without Plan Change**
To provide flexibility for organizations to purchase additional admin or employee capacity without switching their primary subscription plan.
 - **Automate Communication & Status Tracking**
To send automated email notifications for registration approvals, subscription updates, and user management events.
 - **Ensure Data Segregation and Security**
To maintain organization-specific data integrity using logical separation (Database_Name,Suffix) and secure authentication mechanisms.

2.3 Constraints

Constraint	Description
Technology Stack Lock-in	Project is built on ASP.NET (Web Forms and MVC) with MySQL Workbench; switching to another stack mid-way is not feasible.
Database Schema Constraint	The schema is predefined with fixed relations (e.g., Permission_ID must exist in manage_permission).
Plan Limit Enforcement	Organizations cannot exceed allowed limits of admins/employees unless they purchase add-ons.
Manual Approval Workflow	No auto-approval mechanism exists; Super Admin intervention is required for organization activation.
No Offline Support	Application requires active internet; offline usage is not supported.
Security Responsibility	Organizations are responsible for protecting their credentials after provisioning.
No External Payment Gateway	Payment tracking is manual/logged, with no real-time third-party payment gateway integration (Phase 1).
Time Zone Handling	System uses server time zone (IST) by default; no per-organization time zone management is implemented yet.

2.3.1 Hardware Constraints

Server Requirements (For Hosting the Application):

- **Processor:** Minimum 2.5 GHz dual-core processor (quad-core recommended).
- **RAM:** Minimum 8 GB (16 GB or more recommended for optimal performance).
- **Storage:** Minimum 50 GB free disk space (SSD recommended for better performance).
- **Network:** Stable and fast internet connection (1 Gbps or more for high traffic).

Client-Side Requirements (For End Users):

- **Processor:** 1.5 GHz or higher.
- **RAM:** 4 GB or more.
- **Storage:** Sufficient storage for browser and cached data (1-2 GB free space).
- **Display:** 1366x768 resolution or higher.

Backup Hardware:

- Reliable storage for data backup (e.g., external storage or cloud services).
- Redundant servers for failover support in production.

Database Server:

- **Processor:** Multi-core (e.g., Intel Xeon or equivalent).

- **RAM:** Minimum 16 GB (32 GB recommended for large-scale operations).
- **Disk Storage:** High-capacity SSDs for database storage

2.3.2 Software Constraints

Development Environment:

- Visual Studio 2022 with required workloads (ASP.NET and web development).
- .NET Framework or .NET Core (depending on the project's target framework version).
- SQL Server (Express, Standard, or Enterprise edition for the database).

Hosting Environment:

- Windows Server (2016 or later) or a compatible IIS web server.
- .NET runtime (matching the application's framework, e.g., .NET 6 or .NET 7 runtime).

Database:

- SQL Server (local or cloud-hosted).

Client-Side Requirements:

- Modern web browsers (e.g., Chrome, Edge, Firefox) with JavaScript and cookies enabled.
- Bootstrap or other front-end frameworks for responsive design.

Third-Party Libraries/Dependencies:

- Any additional packages or NuGet libraries must align with the .NET version.
- Ensure licenses for all third-party components are valid.

Security:

- HTTPS protocol for secure communication.
- SSL/TLS certificates for production deployment.
- Authentication and authorization.

Integration Requirements:

- APIs or web services (if needed for integration with third-party systems).
- Compatibility with email servers for notifications.

Version Control:

- Git or other version control systems to manage source code.

Deployment:

- Compatible with cloud services like Azure, AWS, or on-premise deployment.

2.4 Advantages

Advantage	Description
1. SaaS-Based & Cloud Hosted	Organizations do not need to manage their own infrastructure; the system is accessible from anywhere with an internet connection.
2. Role-Based Access Control (RBAC)	Permissions and access levels are tightly managed per role—Super Admin, Organization Admin, and Employee—ensuring security and clarity.
3. Modular Subscription Model	Flexible packages (Monthly, Quarterly, etc.) and add-on support allow customers to choose features and scale as needed without switching platforms.
4. Centralized Admin Dashboard	Super Admins have complete visibility into all registered organizations, pending inquiries, package usage, and upgrade activity.
5. Scalable Add-on Model	Organizations can easily upgrade admin or employee capacity without needing to change their core subscription plan.
6. Secure Data Segregation	Each organization's data is logically separated using suffix and Database_Name, ensuring privacy across tenants.
7. Automated Approval & Notification System	Super Admins can manage inquiries and send automated credentials and email notifications upon approval/rejection.
8. Permission Management	Packages are linked to a dynamic permission system, allowing Super Admins to configure feature access per package.
9. Fast Onboarding	Approved organizations can get started immediately with credentials, dashboard access, and package configuration.

2.5 Limitations

- **No Payroll or Biometric Integration :** Payroll processing and biometric attendance features are not built into the system and need to be managed externally.
- **Limited Audit & Analytics Capabilities:** While activity logs exist, advanced audit trails and analytics dashboards are not available in the current version.
- **No Offline Access**
The platform requires a continuous internet connection. Users cannot work offline or cache data for later synchronization.
- **No Built-In Payment Gateway Integration**
Organizations must handle payments outside the system. There is no live integration with Stripe, Razorpay, or similar services.
- **No Task Management System :**
there is no module for task management which can be effective to handle task related to projects.

3. ENVIRONMENT SPECIFICATION

3.1 Hardware & Software Requirements

Hardware Requirement

Processor	Intel Core i7
Memory	4096MB RAM

Software Requirement

Host Operating System (at server side)	Windows 8
Operating System (client side)	Any Operating System
Browser	Google Chrome, Mozilla Firefox
Database	MySQL Workbench
Development	Visual Studio 2022
Server	SQLServer

Service Requirement

Broadband internet connectivity	Windows Server 2008 R2
---------------------------------	------------------------

3.2 Development Description

1. Project Planning and Requirements Gathering:

Objective: Define the project scope, identify key stakeholders, gather detailed requirements, and establish timelines.

Activities:

- Conduct meetings with stakeholders to understand their needs.
- Develop a detailed project plan with milestones and deadlines.
- Create a requirement specification document.

2. Design Phase:

Objective: Create a blueprint for the system architecture, user interfaces, and database schema.

Activities:

- Design wireframes and mock-ups for the user interface.
- Develop a system architecture diagram detailing the interaction between frontend, backend, and database.
- Design the database schema including tables for organization, packages, permissions etc.

3. Frontend Development:

- **Objective:** Build a responsive and user-friendly interface for both super admin and common website.
- **Technologies:** HTML, CSS, JavaScript, and frameworks like React, Angular, or Vue.js.
- **Activities:**
 - Implement Organization registration and login pages.
 - Develop pages for manage organization, manage inquiries, manage permissions, manage packages.
 - Create interfaces for subscription plans, approve/reject inquiry, and organization management.
 - Design super admin dashboards for managing organizations and users.

4. Backend Development:

- **Objective:** Develop server-side logic and database interactions.
- **Technologies:** Node.js with Express, Django, Ruby on Rails, or Laravel.
- **Activities:**
 - Develop business logic for handling organization management, Inquiry management, and subscription plans.
 - Ensure secure data handling for sensitive information.
 - Set up database connections and write queries for CRUD operations.

5. Database Development:

- **Objective:** Design and implement the database to store organizations, permissions, and package information.
- **Technologies:** MySQL, PostgreSQL, or MongoDB.
- **Activities:**
 - Create tables and define relationships between them. Implement indexing and optimization techniques for efficient data retrieval.

6. Integration:

- **Objective:** Integrate third-party services and ensure smooth interaction between different system components.
- **Activities:**
 - Set up email notifications for inquiry request confirmations and updates.
 - Implement APIs for recaptcha and Tiny MCE Editor.

7. Testing:

- **Objective:** Ensure the platform functions correctly, is secure, and provides a good user experience.
- **Activities:**
 - Perform unit testing on individual components.
 - Conduct integration testing to ensure different parts of the system work together.
 - Carry out user acceptance testing (UAT) with stakeholders.
 - Implement automated testing where feasible for regression testing.

8. Deployment:

- **Objective:** Launch the platform and make it accessible to users.
- **Technologies:** AWS, Azure, Google Cloud, or other preferred hosting services.
- **Activities:**
 - Set up the production environment.
 - Deploy the frontend and backend applications.
 - Configure DNS settings and secure the site with HTTPS.
 - Ensure a robust backup and disaster recovery plan is in place.

9. Maintenance and Updates:

- **Objective:** Continuously improve the platform and fix any issues that arise.
- **Activities:**
 - Monitor performance and security metrics.

- Provide regular updates and patches.
- Gather user feedback and implement new features based on demand.
- Conduct periodic security audits and updates.

10. Documentation and Training:

Objective: Provide comprehensive documentation and training materials for users and administrators.

Activities:

- Create user manuals and FAQs.
- Develop technical documentation for developers.
- Provide training sessions or tutorials for sellers and customers.

4. SYSTEM PLANNING

4.1 Feasibility Study

- A Feasibility Study plays very important role in the development of any system. But when it is the case of development of any Website then it's important to increase much more because in this case one should be very clear about the availability of the time and resources.
- Before starting the development of the software one should give considerable amount of time for feasibility study because the successful completion of the Project depends upon its Feasibility.

Operational Feasibility :

During the operational feasibility one has to take care about the system's impact on the other systems and its tendency to fulfil the requirements of the organisation while working interfering to fulfil the requirements while working without interfering to the other existing system.

Technical Feasibility :

The Technical Feasibility involves the study about the availability of the tools and hardware as well as software requirements for the development and the implementation of the system. During the study it was decided to use MySQL Workbench 6.3 CE.

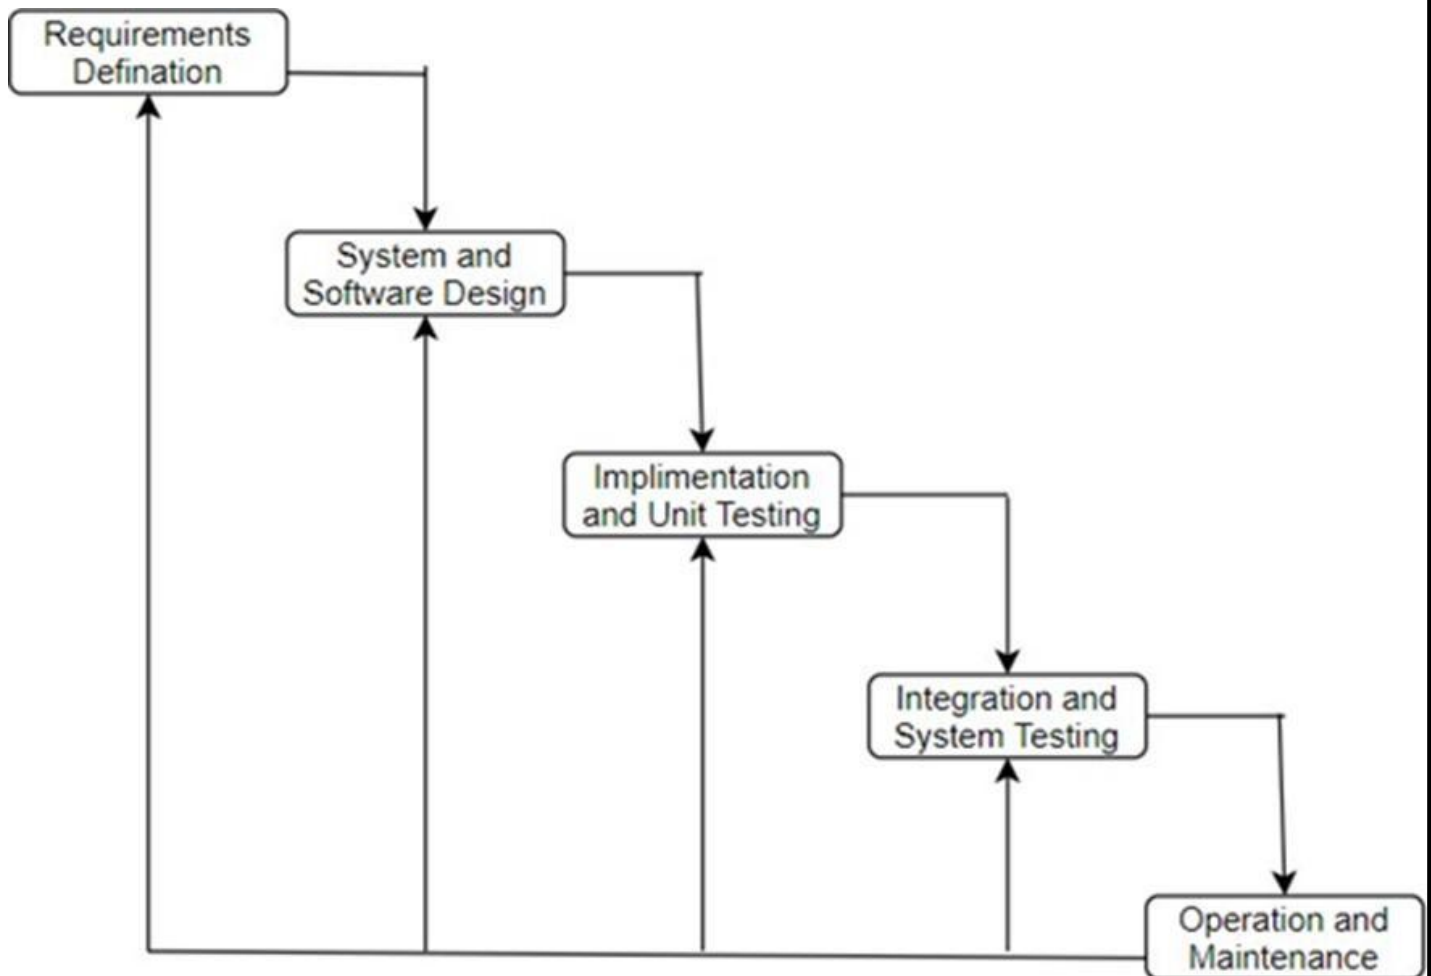

Resources :

When developing any system, we need proper environment resources as well as man power Also our team members are acquainted to such type of development environment. For gathering more help when development application we also provision of an internet connection.

Time Duration :

We had Three months to develop the entire system. We prepared a time schedule which can efficiently manage proper time required for project work.

4.2 SOFTWARE ENGINEERING MODEL

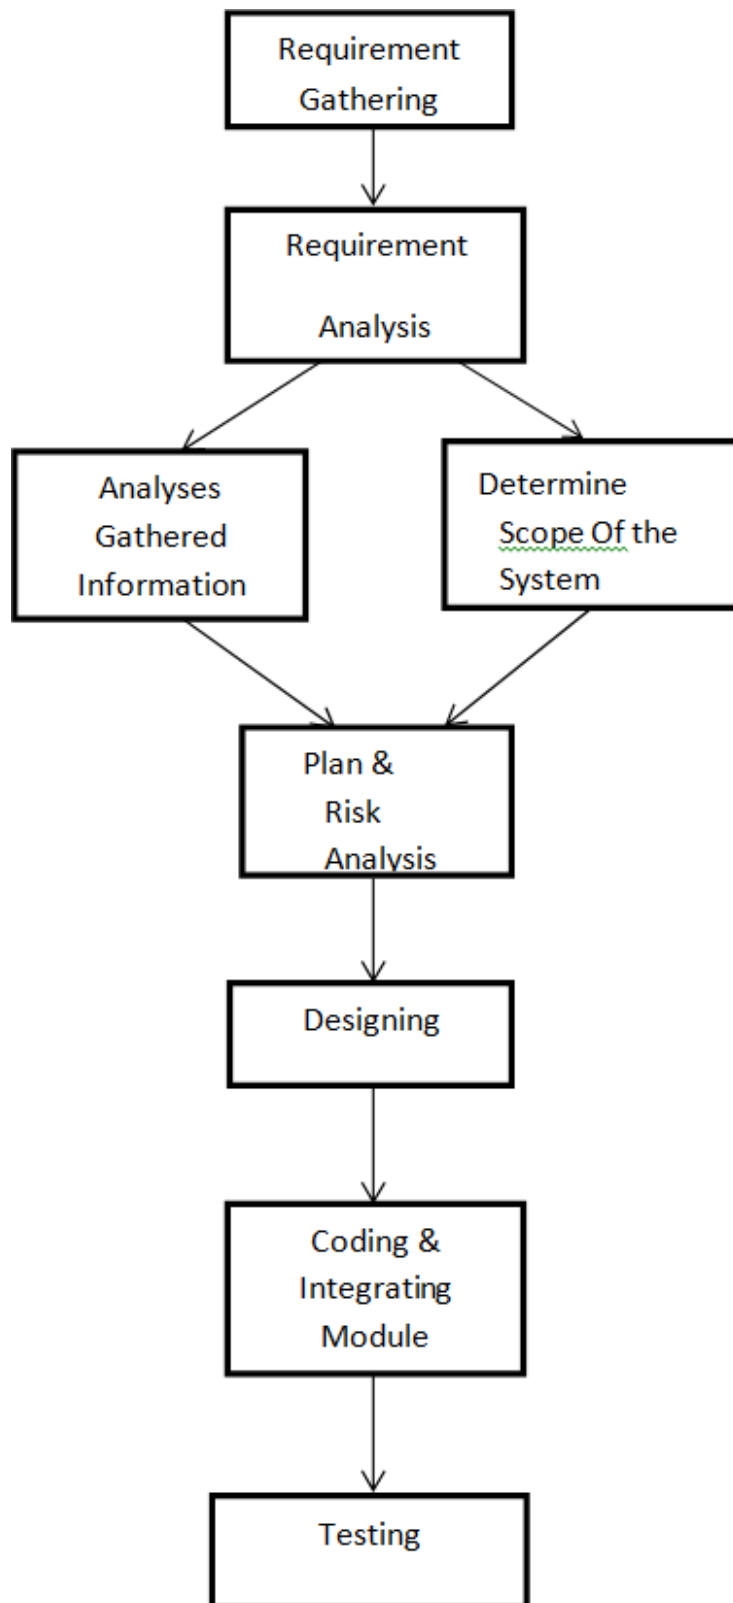

4.3 RISK ANALYSIS

- ✓ The key purpose of classifying risk is to get a collective viewpoint on a group of factors. These are the types of factors which will help project managers to identify the group that contributes the maximum risk.
- ✓ A best and most scientific way of approaching risks is to classify them based on risk attributes. Risk classification is considered as an economical way of analysing risks and their causes by grouping similar risks together into classes.
- ✓ Web application risks could be classified as internal or external. Those risks that come from risk factors within the organisation are called internal risks whereas the external risks come from out of the organisation and are difficult to control.
- ✓ Internal risks are project risks, process risks, and product risks. External risks are generally a business with the vendor, technical risks, customers' satisfaction, political stability and so on.
- ✓ In general, there are many risks in the web application engineering which are very difficult or impossible to identify all of them. Some of the most important risks in web application engineering projects are categorised as web application requirement risks, web application cost risks, web application scheduling risk, web application quality risks, and web application business risks.

4.4 PROJECT SCHEDULE

4.4.1 TASK DEPENDENCY

4.4.2 TIMELINE CHART

Task	Month1				Month2				Month3			
1) Requirement analysis												
Collected requirement from our guide												
Analyse gathered information												
Determine scope of the system												
Milestone: req. Analysis complete												
2) Planning and risk analysis												
Analyse data for possible risks												
Identify technical risks												
Determine different modules												
Milestone: Planning completed												
3) Designing												
Design basic interface of the site												
Design database tables												
Design web form for modules												
Milestone: designing completed												
4) Coding and integrating modules												
Implement logic for different modules												
Implement database connectivity												
Integrate different modules												
Implement Report												
Milestone: coding completed												
5) Testing												
Validate input control and check accuracy of												
Milestone: testing completed												
6) Documentation												
Milestone: testing completed												

5. SYSTEM ANALYSIS

5.1 DETAILED SRS

Module : Super Admin,Admin,Employee

Super Admin :

- **Login:** Super Admin Can Login In this Module And Access All Rights of this Module.
- **Manage Inquiry :** Approve/reject Organization registration Request
- **Manage Organization :** Manage organization information and also active/deactive organization
- **Manage Permissions :** manage permissions to allowed in time.staffiio project
- **Manage Package :** Manage package information like it's pricing and plan and allowed permissions according to plan.

Admin :

- **Login:** Admin Can Login In this Module And Access All Rights of this Module.
- **Registration:** Admin can register new Employees.
- **Manage Organization :** Can manage Organization info and upgrade subscription Plan
- **Timesheet:** Admin can view all employee timesheet working hours.
- **Calendar :** Display attendance summary of all user
- **Holiday:** Admin can Add, Edit, Delete and view all Holiday details.
- **Celebration:** Admin can Add, Edit, Delete and View Celebration details.
- **Leave:** Admin can Approve/Reject , Delete and view the leave details and admin can get notification leave if employee leave can not approve.
- **Manage Salary Slip :** Generate and track salary slip history of employee
- **Manage Documents :** Generate and issue documents to employee
- **Birthday Report:** Admin can View All employee birthdates and see notification of upcoming employee birthdays.
- **Manage Inventory :** Manage inventory and assets
- **Rules:** Admin can Add, Edit And Delete and View the Rules details.
- **Manage Interview:** All interview person details will add and manage from the admin side. And also can add,update and delete interview questions which are asked during the interview session.
- **LoginLog:** Admin can see all employee and admin login details .
- **Activity Logs:** Admin can see activity of employee on the project.
- **Logger Logs:** It is helpful for developer to track the error or exception while developing product. Or letter on if any issue found.

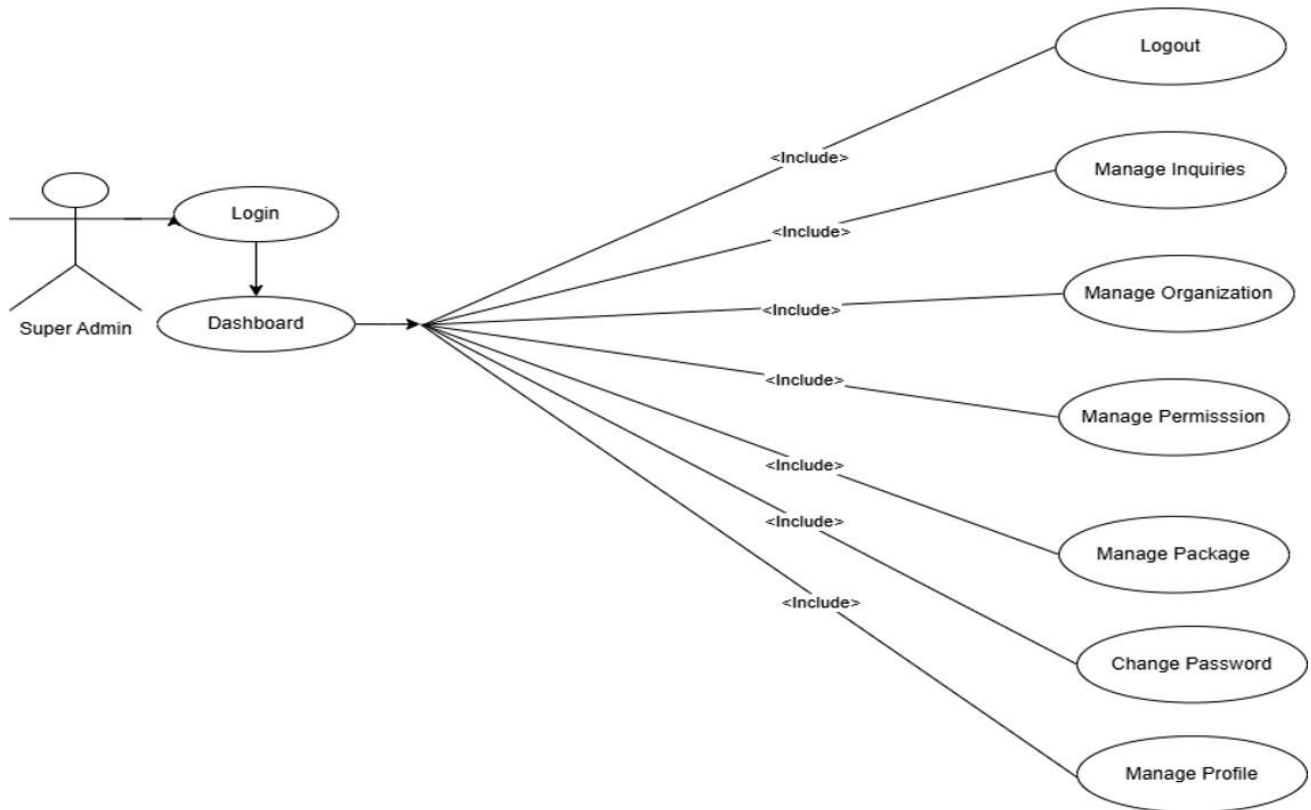

Employee :

- **Login:** Employees only can login from a specific company location in this module and access all rights of this module.
- **Edit Profile:** Employees can Edit your forgotten password,Tshirt Size,vehicle no and view their project profile.
- **Timesheet:** Employee can Time(In Time, Intermediate Start, Intermediate End, Out Time)and also see your worked hours.
- **Holiday:** Employees can see upcoming holidays and notifications.
- **Calendar:** employee can see their timesheet and irregularities reasons of current and previous month
- **Leave:** Employee can apply leave and see their leave status.
- **Birthday Report:** employees can see all employee birthdays and get notification on upcoming birthdays.
- **Rules:** Employee see Rules Description

Manage.Staffilio :

1) Manage_Organization

Description: This table stores organization details.

Sr. No	Field Name	Data Type	Constraints	Description
1	Organization_id	int(11) AI PK	Primary Key	Organization id
2	Organization_name	varchar(45)	Null	Organization Name
3	Fname	Varchar(45)	Null	Organization FName
4	Lname	Varchar(45)	Null	Organization LName
5	Suffix	datetime	Null	Organization Suffix
6	Logo_image	datetime	Null	Organization Logo
7	Database_Name	varchar(45)	Null	Organization Password
10	Contact_no	varchar(45)	Null	Organization Contact no
11	Address	varchar(45)	Null	Organization address
12	City	varchar(45)	Null	Organization city
13	ZipCode	varchar(45)	Null	Organization zipcode
14	State	varchar(45)	Null	Organization state
15	Country	varchar(45)	Null	Organization country
16	Email	varchar(45)	Null	Organization email
17	Selected_Package	Varchar(45)	Null	Package(eg.Basic,Intermediate,Advanced)
18	Website_url	Varchar(45)	Null	Admin/employee dashboard
19	Pakagae_Start_Date	Datetime	Null	Package started date

Sr. No	Field Name	Data Type	Constraints	Description
20	Pakagae_End_Date	Datetime	Null	Package Ended date
21	Request_Status	Varchar(45)	Null	Request status of Approved / rejected/ cancelled
22	Is_Active	varchar(45)	Null	Yes/No
23	Plan_Type	Varchar(45)	Null	Package plan type
24	New_Start_Date	dateTime	Null	upgrade started date
25	Upgraded_Plan	Varchar(45)	Null	package upgarded plan
26	New_End_Date	DateTime	Null	upgrade ended date
27	Extra_Admin	INT(11)	Null	current package added extra admin count
28	Extra_Employee	INT(11)	Null	current package added extra employee count
29	Created_at	DateTime	Null	Created Date
30	Updated_at	DateTime	Null	Modified Date

2) Manage_Permission

Description: This table stores permission available for time.staffilio project

Sr. No	Field Name	Data Type	Constraints	Description
1	Permission_ID	int(11) AI PK	Primary Key	Permission Id
2	Permission	varchar(45)	Null	Permission
3	Entry_Date	Datetime	Null	Created date
4	Last_Modified_Date	datetime	Null	Updated date
5	CreatedBy	Varchar(45)	Null	Name of the person who created it

Sr. No	Field Name	Data Type	Constraints	Description
6	ModifiedBy	Varchar(45)	Null	Name of the person who last modified

3) Package_Pricing

Description: This table stores all the details related to package plan

Sr. No	Field Name	Data Type	Constraints	Description
1	Package_Id	int(11) AI PK	Primary Key	package Id
2	Package_Name	varchar(45)	Null	Package name
3	Permission_Id	varchar(200)	Not Null	Comma separated permission Ids for package
4	No_Of_Admins	int	Null	No of admins allowed in package
5	No_Of_Employees	int	Null	No of employees allowed in package
6	Monthly_Price	Int(11)	Null	monthly package wise price
7	Quarterly_Price	Int(11)	Null	quarterly package wise price
8	Half_yearly_price	Int(11)	Null	half yearly package wise price
9	Annual_Price	Int(11)	Null	annual package wise price
10	Is_Active	Varchar(45)	Null	package is active or not (Yes or No)
11	CreatedBy	Varchar(45)	Null	Name of the person who created it
12	ModifiedBy	Varchar(45)	Null	Name of the person who last modified
13	Entry_Date	datetime	Null	Created Date

Sr. No	Field Name	Data Type	Constraints	Description
14	Last_Modified_Date	datetime	Null	Modified date
15	price_per_admin	Int(11)		
16	price_per_employee	Int(11)		

4) upgrade_user_purchases :

Sr. No	Field Name	Data Type	Constraints	Description
1	Upgrade_User_Purchase_Id	int(11) AI PK	Primary Key	Upgrade User Purchase Id
2	Organization_Id	varchar(36)	Null	Organization Id
3	Admin_Purchased	INT(11)	Null	No. of admin purchased
4	Employee_Purchased	INT(11)	Null	No. of employees purchased
5	Amount_Paid	INT(11)	Null	Amount Paid
6	Purchase_Date	datetime	Null	Purchased Date
7	Created_By	varchar(45)	Null	Created by

Asc.Wokontech :

1. asc_user_registration

Description: This table stores user details.

Sr. No	Field Name	Data Type	Constraint s	Description
1	User_ID	int(11) AI PK	Primary Key	Interview Id
2	Email	varchar(45)	Null	Candidate first name
3	Password	varchar(45)	Null	Candidate last name
4	First_Name	varchar(45)	Null	Candidate phone no
5	Last_Name	varchar(45)	Null	Candidate email
6	User_Image	varchar(45)	Null	Candidate dob
7	Phone	varchar(20)	Null	Candidate gender
8	DOB	date	Null	Candidate address
9	Address	varchar(120)	Null	Candidate city
10	City	varchar(45)	Null	Candidate state
11	State	varchar(45)	Null	Candidate country
12	Country	varchar(45)	Null	Candidate zipcode
13	ZipCode	varchar(20)	Null	Candidate education
14	Is_Active	varchar(45)	Null	Passout year
15	Is_Deleted	varchar(12)	Null	University name
16	Entry_Date	datetime	Null	University city

Sr. No	Field Name	Data Type	Constraint s	Description
17	Last_Modified_Date	datetime	Null	University country
18	Attempts_Count	Int(11)	Default(0)	
19	CreatedBy	varchar(45)	Null	University state

2)asc_login_logs

Description: This table stores Login details of website.

Sr. No	Field Name	Data Type	Constraint s	Description
1	Login_Logs_Id	int(11) AI PK	Primary Key	Login Log Id
2	Email	varchar(45)	Null	Login Email
3	Password	varchar(45)	Null	Login password
4	User_Role	varchar(45)	Null	Role of login person
5	Project_Name	varchar(45)	Null	Project name
6	Result	varchar(45)	Null	Result of login try
7	IpAddress	varchar(45)	Null	Ip address of login location
8	LoginDate	datetime	Null	Login date and time

3)asc_permission

Description: This table stores permission name of projects.

Sr. No	Field Name	Data Type	Constraint s	Description
1	Permission_ID	int(11) AI PK	Primary Key	Permission ID
2	Project_ID	int(11)	Null	Project Id
3	Permission	varchar(45)	Null	Permission name
4	Entry_Date	datetime	Null	Entry date
5	Last_Modified_Date	datetime	Null	Last modified date
6	CreatedBy	varchar(45)	Null	Created by
7	ModifiedBy	varchar(45)	Null	Modified by

4)asc_project_manage

Description: This table stores Project details like project name, audience key, audience_id, project status, created date Etc...

Sr. No	Field Name	Data Type	Constraint s	Description
1	Project_ID	int(11) AI PK	Primary Key	Project id
2	Project_Name	varchar(45)	Null	Project name
3	Audience_Id	varchar(45)	Null	Audience id
4	Audience_Key	varchar(45)	Null	Audience key
5	Proj_Status	varchar(45)	Null	Project status
6	Entry_Date	datetime	Null	Entry date
7	Last_Modified_Date	datetime	Null	Last modified date

Sr. No	Field Name	Data Type	Constraint s	Description
8	CreatedBy	varchar(45)	Null	Created by
9	ModifiedBy	varchar(45)	Null	Modified by

5)asc_project_role_detail

Description: This table stores project wise role of users.

Sr. No	Field Name	Data Type	Constraint s	Description
1	Project_Manage_ID	int(11) AI PK	Primary Key	Project manage id
2	Project_ID	int(11)	Null	Project id
3	User_ID	int(11)	Null	User id
4	Role_ID	int(11)	Null	Role id
5	Permission_ID	varchar(200)	Null	Permission id
6	Entry_Date	datetime	Null	Entry date
7	Last_Modified_Date	datetime	Null	Last modified date
8	CreatedBy	varchar(45)	Null	Created by
9	ModifiedBy	varchar(45)	Null	Modified by

6)asc_role

Description: This table stores role type.

Sr. No	Field Name	Data Type	Constraint s	Description
1	Role_ID	int(11) AI PK	Primary Key	Role id

Sr. No	Field Name	Data Type	Constraints	Description
2	User_Role	varchar(45)	Null	User role
3	Entry_Date	datetime	Null	Entry date
4	Last_Modified_Date	datetime	Null	Last modified by
5	CreatedBy	varchar(45)	Null	Created by
6	ModifiedBy	varchar(45)	Null	Modified by

Time.Staffilio :

1. emp_registration :

Description: This table stores detail about employee and admin information

Sr. No	Field Name	Data Type	Constraints	Description
1	emp_id	int(11) AI PK	Primary Key	Employee Id of Emp.
2	Asc_id	Varchar(36)		
3	fname	varchar(45)	Null	First Name of Employee
4	lname	varchar(45)	Null	Last Name of employee
5	gender	varchar(45)	Null	Employee gender
6	email	varchar(45)	Null	Employee company email
7	Personal_email	varchar(45)	Null	Employee personal Email

Sr. No	Field Name	Data Type	Constraint s	Description
8	phone2	varchar(12)	Null	Employee alternate phone no
9	reference_by	varchar(45)	Null	Employee reference by
10	joining_date	date	Null	Joining date of employee
11	Leave_Date	datetime	Null	Company Leave date of emp.
12	Role	varchar(45)	Null	Employee role in company
13	Is_Deleted	varchar(12)	Null	Is employee deleted

52	Approved_By	varchar(45)	Null	Salary approved by
53	Approved_Date	date	Null	Approved date

Sr. No	Field Name	Data Type	Constraints	Description
54	Last_Modified_Date	datetime	Null	Last modified date
55	ModifiedBy	varchar(45)	Null	Modified by

6. celebration_details:

Description: This table stores details about ongoing celebration.

Sr. No	Field Name	Data Type	Constraints	Description
1	celebration_id	int(11) AI PK	Primary Key	Celebration id
2	celebration_date	date	Null	Celebration date
3	celebration_name	varchar(70))	Null	Celebration name
4	celebration_description	varchar(80))	Null	Celebration description
5	entry_date	datetime	Null	Entry date
6	last_modified_date	datetime	Null	Last modified date

7. Announcement_details:

Description: This table stores details about ongoing celebration.

Sr. No	Field Name	Data Type	Constraints	Description
1	Announcement_id	int(11) AI PK	Primary Key	Announcement id
2	Announcement_Date	date	Null	Announcement date

Sr. No	Field Name	Data Type	Constraints	Description
3	Announcement_description	varchar(150)	Null	Announcement description
4	entry_date	datetime	Null	Entry date
5	last_modified_date	datetime	Null	Last modified date

8. Rule_details:

Description: This table stores all rules that created by admin.

Sr. No	Field Name	Data Type	Constraints	Description
1	Rule_Id	int(11) AI PK	Primary Key	Rule id
2	description	varchar(350)	Null	Rule description
3	entry_date	datetime	Null	Rule entry date
4	last_modified_date	datetime	Null	Last modified date

9. Request_details:

Description: This table stores request details, which is applied by the employee.

Sr. No	Field Name	Data Type	Constraints	Description
1	Request_Id	int(11) AI PK	Primary Key	Request id
2	Emp_Id	int(11)	Null	Employee id
3	First_Name	varchar(45)	Null	First name
4	Last_Name	varchar(45)	Null	Last name

Sr. No	Field Name	Data Type	Constraint s	Description
5	Request_For	varchar(45)	Null	Request for
6	Request_Reason	varchar(90)	Null	Request reason
7	Request_Date	datetime	Null	Request date
8	IsApproved	varchar(45)	Null	Request status of Approved / rejected/ cancelled

10. add_request:

Description: This table stores request options, which is add by admin.

Sr. No	Field Name	Data Type	Constraint s	Description
1	Req_Id	int(11) AI PK	Primary Key	Request id
2	Request_Name	varchar(45)	Null	Request name
3	Entry_Date	datetime	Null	Entry date

11. document_assign_history

Description: This table stores history for tshirt stock.

Sr. No	Field Name	Data Type	Constraint s	Description
1	H_id	int(11) AI PK	Primary Key	History id
2	Document_Name	varchar(45)	Null	Document name
3	Full_name	varchar(45)	Null	Full name
4	Email	varchar(45)	Null	email
5	Personal_email	varchar(45)	Null	Personal email

Sr. No	Field Name	Data Type	Constraint s	Description
6	Content_Text	longtext	Null	Content text
7	Assign_Date	datetime	Null	Assign date
8	Assign_By	varchar(45)	Null	Assign by

12. emergency_detail

Description: This table stores emergency contact details.

Sr. No	Field Name	Data Type	Constraint s	Description
1	emp_id	int(11) AI PK	Primary Key	Employee id
2	User_id	int(11)	Null	User id
3	Name	varchar(45)	Null	Employee name
4	Relation	varchar(45)	Null	Employee relation
5	Contact	varchar(15)	Null	Contact details
6	last_modified_date	datetime	Null	Last modified date
7	ModifiedBy	varchar(45)	Null	Modified by

13. family_detail

Description: This table stores details of employee family.

Sr. No	Field Name	Data Type	Constraint s	Description
1	fam_id	int(11) AI PK	Primary Key	id
2	User_id	int(11)	Null	User id

Sr. No	Field Name	Data Type	Constraint s	Description
3	Name	varchar(45)	Null	Name of person
4	Relation	varchar(45)	Null	Employee relation
5	Dob	date	Null	Family person dob
6	Occupation	varchar(45)	Null	person occupation
7	Education	varchar(45)	Null	Family education
8	Address	varchar(145)	Null	Family address
9	last_modified_date	datetime	Null	last modified date
10	ModifiedBy	varchar(45)	Null	Family modified by

14. medical_detail

Description: This table stores medical details of employees.

Sr. No	Field Name	Data Type	Constraints	Description
1	Med_id	int(11) AI PK	Primary Key	id
2	User_id	int(11)	Null	User id
3	Physician	varchar(45)	Null	Doctor name
4	Address	varchar(100)	Null	Hospital address
5	Contact_Number	varchar(15)	Null	Hosp. contact number

Sr. No	Field Name	Data Type	Constraints	Description
6	Medical_Condition	varchar(90)	Null	Medical conditions
7	Current_Medications	varchar(150)	Null	Regular medicines
8	Allergies	varchar(150)	Null	allergies
9	Additional_information	varchar(150)	Null	Additional info.
10	last_modified_date	datetime	Null	Last modified date
11	ModifiedBy	varchar(45)	Null	Modified by

15. work_experience_detail

Description: This table stores work experience details of employee.

Sr. No	Field Name	Data Type	Constraints	Description
1	Exp_id	int(11) AI PK	Primary Key	Record id
2	User_id	int(11)	Null	User id
3	Company	varchar(45)	Null	Company name
4	City	varchar(45)	Null	Company city
5	Position	varchar(45)	Null	Company position
6	From_Date	date	Null	From date
7	To_Date	date	Null	To date
8	last_modified_date	datetime	Null	Last modified date

Sr. No	Field Name	Data Type	Constraints	Description
9	ModifiedBy	varchar(45)	Null	Modified by

16. emp_document_format

Description: This table stores history for tshirt stock.

Sr. No	Field Name	Data Type	Constraints	Description
1	Doc_Id	int(11) AI PK	Primary Key	Document id
2	Document_Name	varchar(45)	Null	Document name
3	Content_Text	longtext	Null	Document content
4	Entry_Date	datetime	Null	Entry date
5	CreatedBy	varchar(45)	Null	Created by
6	Last_Modified_Date	datetime	Null	Last modified date
7	Modified_By	mediumtext	Null	Modified by

17. activity_logs

Description: This table stores user activity logs.

Sr. No	Field Name	Data Type	Constraints	Description
1	Id	int(11) AI PK	Primary Key	id
2	username	varchar(55)	Null	username
3	module_name	varchar(45)	Null	Module name/Page name
4	activity	varchar(100))	Null	Activity performed by user

Sr. No	Field Name	Data Type	Constraints	Description
5	description	varchar()	Null	description
6	entry_date	Datetime	Null	date

18. education_detail

Description: This table stores employees education details.

Sr. No	Field Name	Data Type	Constraint s	Description
1	E_id	int(11) AI PK	Primary Key	id
2	User_id	int(11)	Null	User id
3	University	varchar(45)	Null	University name
4	College	varchar(45)	Null	College name
5	Degree	varchar(45)	Null	Degree
6	Pass_out_year	date	Null	Passout year
7	City	date	Null	University city
8	last_modified_date	datetime	Null	Last modified date
9	ModifiedBy	varchar(45)	Null	Modified by

19. emp_work_depart_and_position

Description: This tables stores the details of work department and work designation of employee

Sr. No	Field Name	Data Type	Constraints	Description
1	record_id	int(11) AI PK	Primary Key	id
2	emp_id	int(11)	Null	Emp id

Sr. No	Field Name	Data Type	Constraints	Description
3	work_department	varchar(45)	Null	Work department
4	work_position	varchar(45)	Null	Work position
5	promotion_date	varchar(45)	Null	Promotion date
6	entry_by	date	Null	Entry by
7	entry_date	date	Null	Entry date
8	modified_by	datetime	Null	Modified by
9	modified_date	varchar(45)	Null	Modified date

20. Manage_skill

Description: This table stores the skills options

Sr. No	Field Name	Data Type	Constraints	Description
1	Skill_Id	int(11) AI PK	Primary Key	id
2	Skill	longtext	Null	Skills
3	Entry_by	varchar(45)	Null	Entry by
4	Entry_Date	datetime	Null	Entry date
5	Modifiy_By	varchar(45)	Null	Modified by
6	Modifiy_Date	datetime	Null	Modified date

21. manage_work_position

Description: This table stores the skills options

Sr. No	Field Name	Data Type	Constraints	Description
1	Position_Id	int(11) AI PK	Primary Key	id
2	Work_Positi on	varchar(45)	Null	Work position
3	Entry_By	varchar(45)	Null	Entry by
4	Entry_Date	Date	Null	Entry date
5	Modifiy_By	varchar(45)	Null	Modified by
6	Modifiy_Date	datetime	Null	Modified date

22. work_department

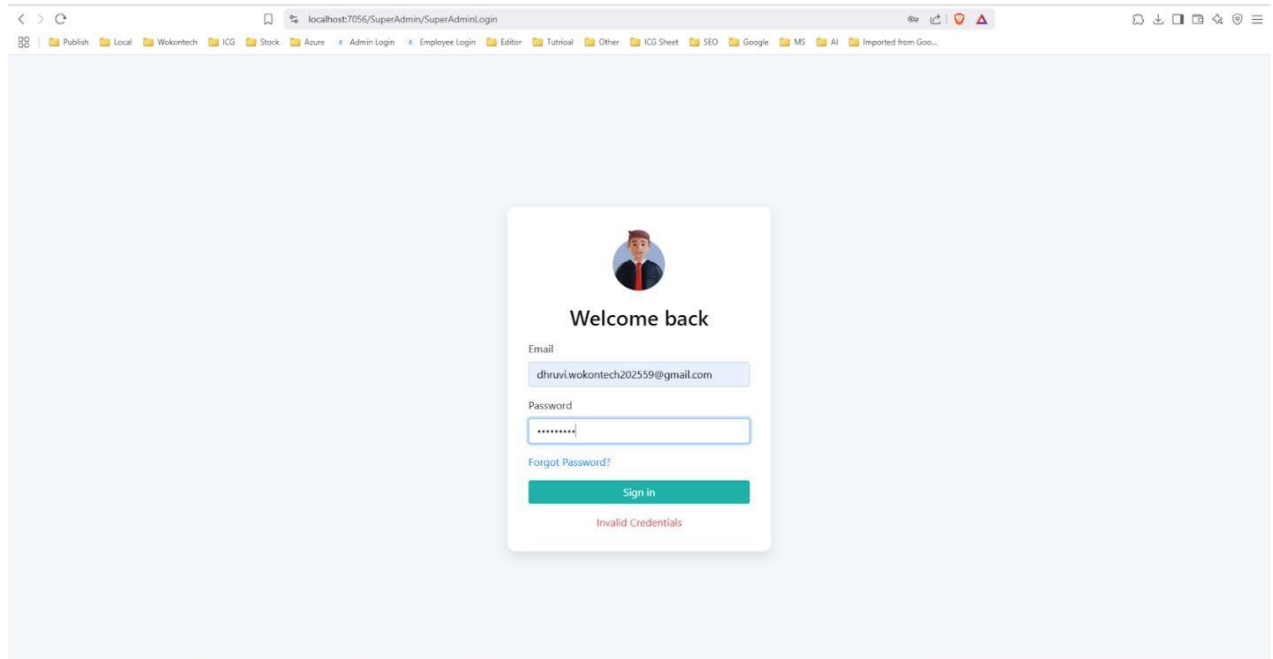

Description: This table stores the work departments

Sr. No	Field Name	Data Type	Constraints	Description
1	Department_Id	int(11) AI PK	Primary Key	Record id
2	Department_name	varchar(55)	Null	Department name
3	Entry_By	varchar(45)	Null	Entry by
4	Entry_Date	date	Null	Entry date
5	Modifiy_By	varchar(45)	Null	Modified by
6	Modifiy_Date	datetime	Null	Modified date

6.2 INTERFACE DESIGN

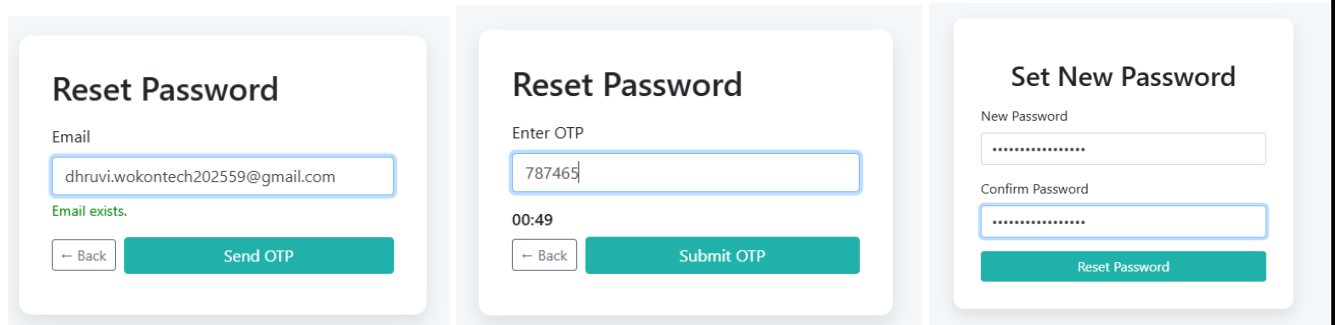

Manage.staffilio :

Super Admin Login: Only super admin with valid credentials are allowed to login and access system.

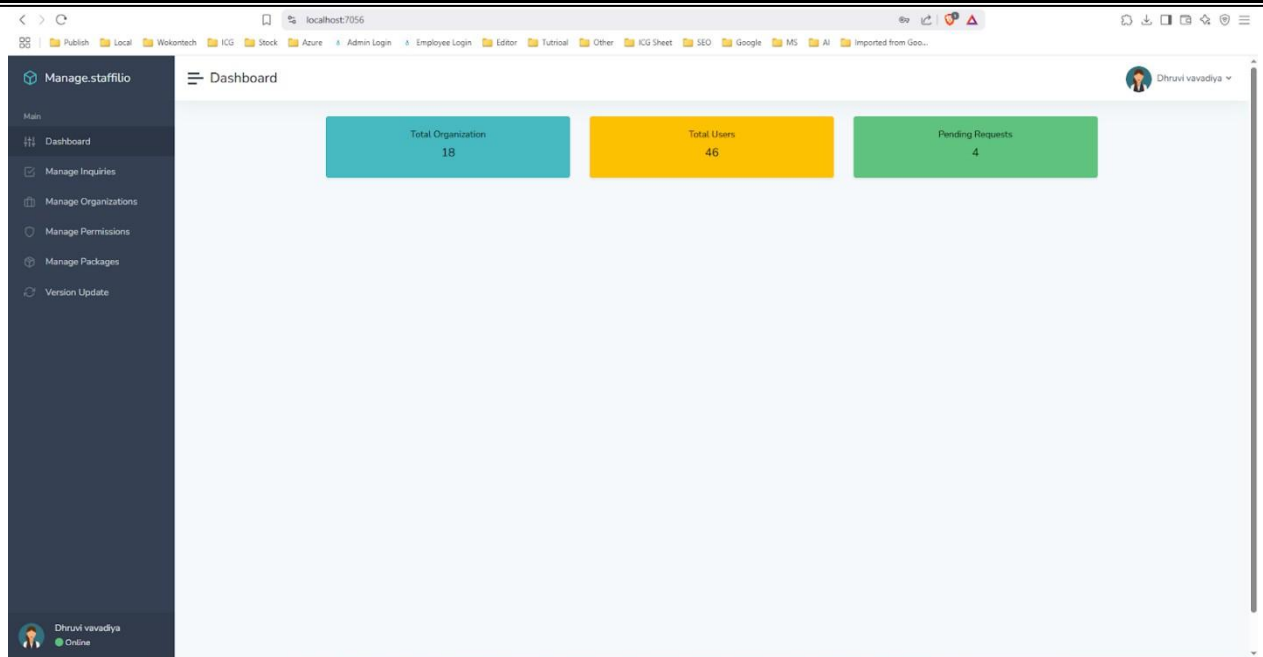

The screenshot shows a web browser window with the URL `localhost:7056/SuperAdmin/SuperAdminLogin`. The page features a light blue background. In the center, there is a white card with a circular profile picture of a man. Below the picture, the text "Welcome back" is displayed. There are two input fields: "Email" with the value `dhruvi.wkontech202559@gmail.com` and "Password" with masked characters. A "Forgot Password?" link is present. A green "Sign in" button is at the bottom of the card. Below the button, a red error message "Invalid Credentials" is shown.

Forget Password : User can reset password with registered email id and valid OTP.

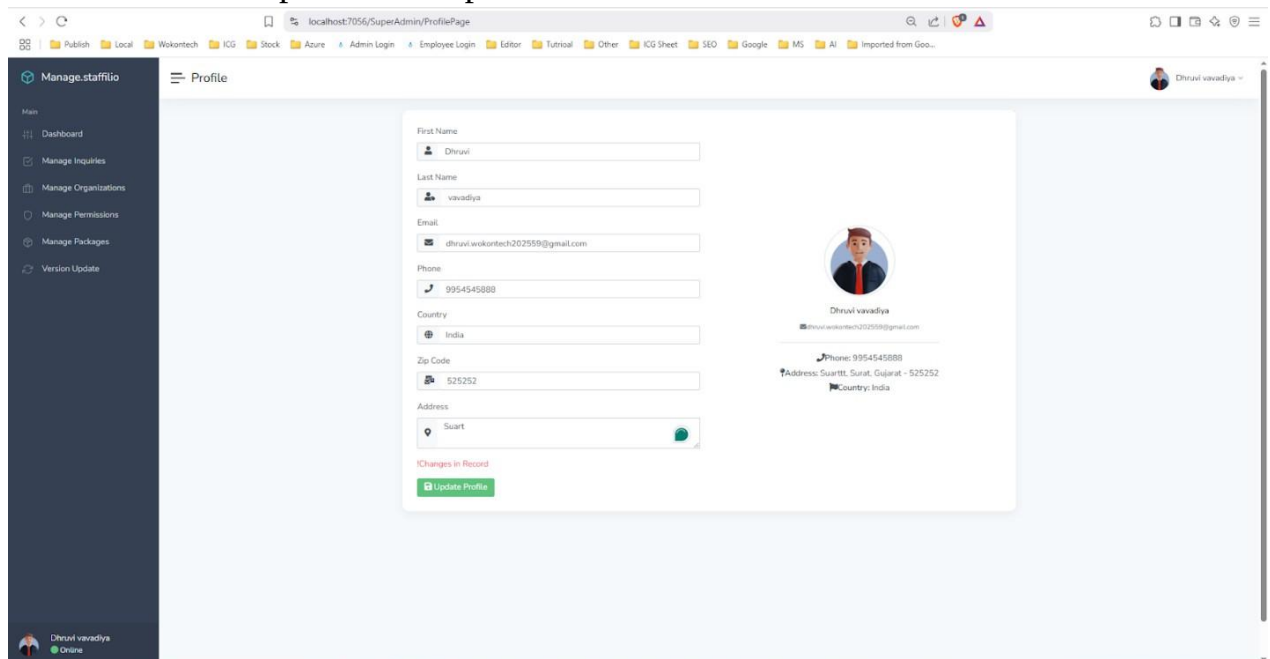

The first screenshot, titled "Reset Password", shows the email field with `dhruvi.wkontech202559@gmail.com` and a green message "Email exists.". It has a "Back" button and a "Send OTP" button. The second screenshot, also titled "Reset Password", shows the "Enter OTP" field with the value `787465`, a timer at `00:49`, a "Back" button, and a "Submit OTP" button. The third screenshot, titled "Set New Password", shows "New Password" and "Confirm Password" fields, both with masked characters, and a "Reset Password" button.

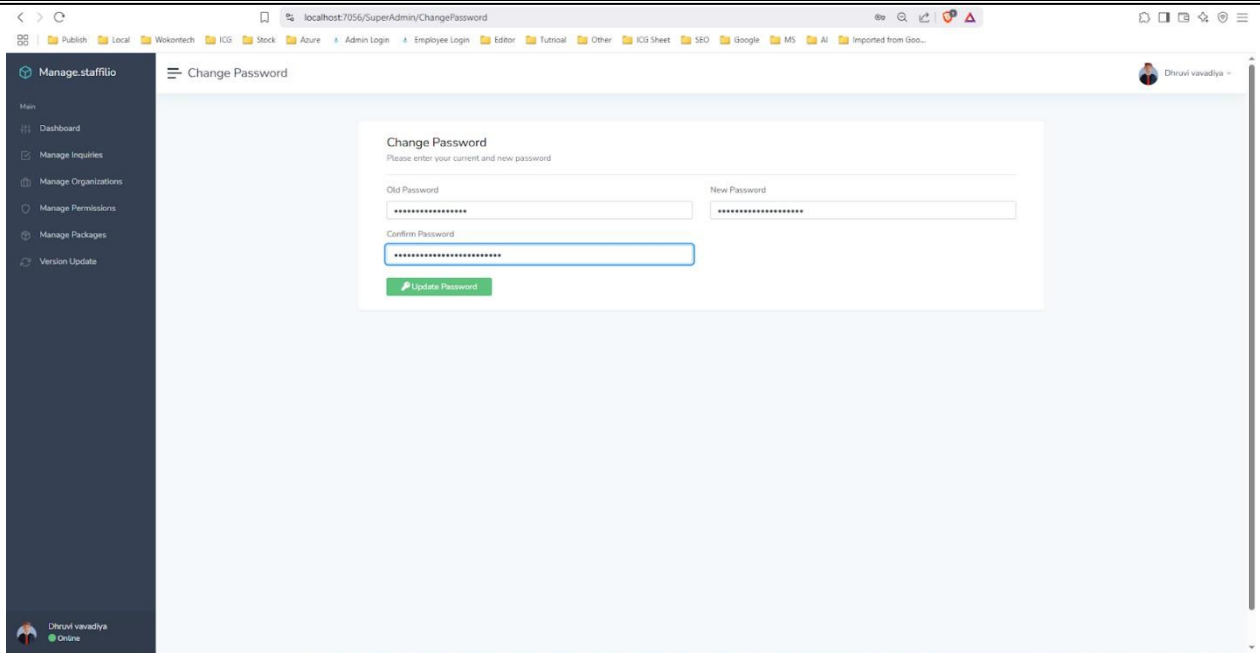

Super Admin Dashboard : Displays count of total organizations, Total User and total pending requests.

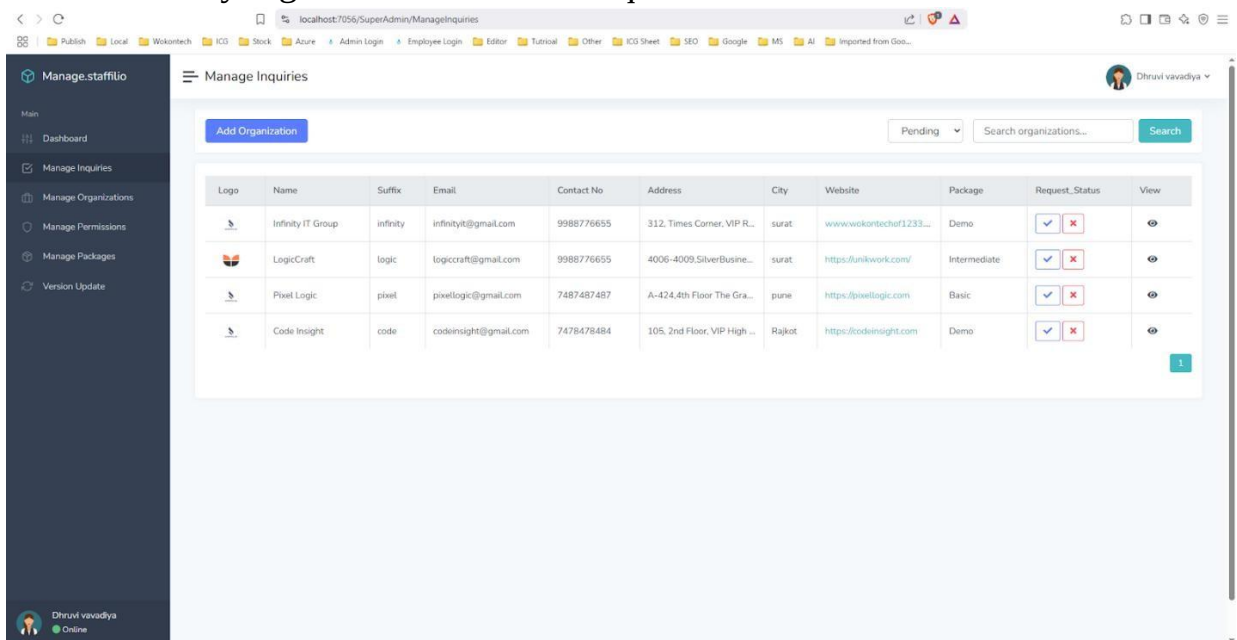

Profile : Shows super admin's profile information.

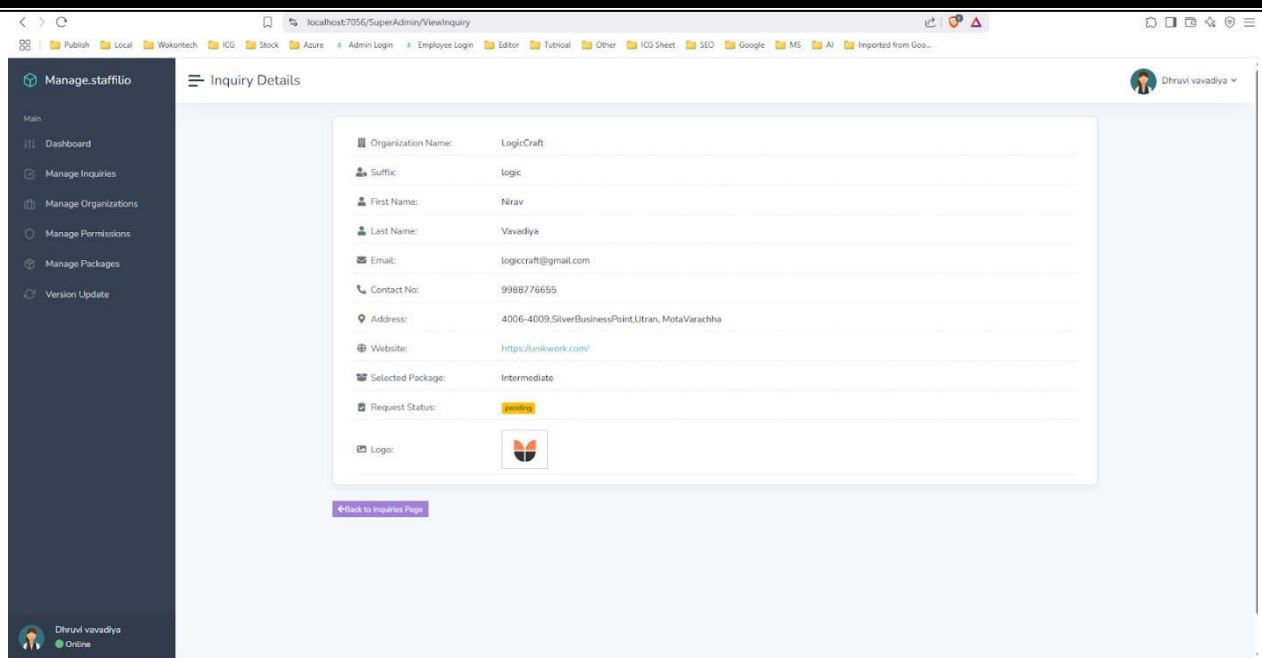

Change Password : super admin can change password.

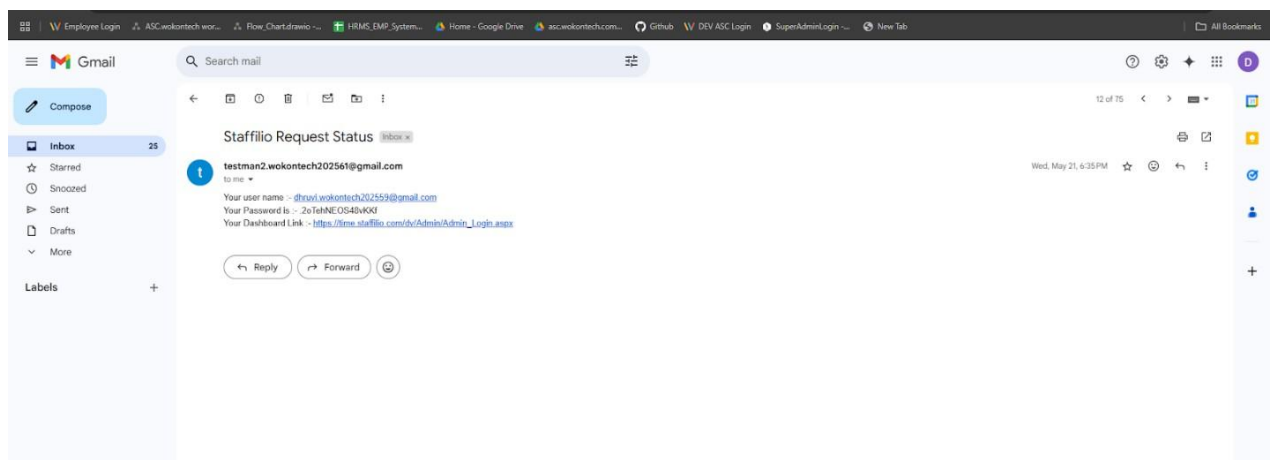

Manage Inquiries : Super admin can approve/reject organization's request and send email for notify organization about his request status.

If organization request is approved by super admin then it sends credentials for login and admin panel link so that admin can login to their organization specific admin panel.

Manage Organizations : from here, super admin can manage organizations, He can active/deactive organization also to prevent organization to use time.staffilio system.

Employee Profile :

Here on employee Profile, Employee can see their Details and edit their Identification, Education and profile related details.

The screenshot shows the 'Employee Profile' page. The left sidebar contains navigation links: Dashboard, TimeSheet, Calendar, Holidays, Leaves, Do Request, Birthday Report, and Rules. The main content area is titled 'Profile' and displays a user profile for 'shruti vts' with email 'shruti@gmail.com'. The profile includes a profile picture, a 'Schedule' section with 'In Time 10:30 AM', 'Work Time 09:00', and 'Out Time 07:30 PM', and an 'About' section with fields for Birthday (06/04/2009), Gender (Female), phone (3984538568), Work Department (Web Development), Work Position (Backend Developer), and Lives in (katargam, Surat, Gujarat, India, 390005). An 'Edit Profile' button is visible in the top right of the profile card. The footer shows 'Copyright © 2012- 2025 Wokontech IT Solution All Rights Reserved.' and the user's status as 'Online'.

The screenshot shows the 'Update User Details' page. The left sidebar is the same as the previous page. The main content area is titled 'Update User Details' and features a progress bar for 'Employee Name : shruti vts' at 100%. The 'Identification' section is active, showing fields for First Name (shruti), Middle Name (vipulbhai), Last Name (vts), P: Password (1234), Personal Phone #1 (0000 0000 00), Personal Phone #2 (0000 0000 00), Personal email (shruti@gmail.com), Date Of Birth (mm/dd/yyyy), Gender (Male/Female), Marital status (Single/Married), Address (Apartment, studio, or floor), City, State, Country, and ZipCode. Each field has a 'Request' button. A 'Next' button is at the bottom right. The footer shows 'Copyright © 2012- 2025 Wokontech IT Solution All Rights Reserved.' and the user's status as 'Online'.

Change Password :

employee can change their user password.

The screenshot shows the 'Change Password' page in the Employee Panel. The page has a dark sidebar with navigation links: Dashboard, TimeSheet, Calendar, Holidays, leaves, Do Request, Birthday Report, and Rules. The main content area is titled 'Change Password' and contains three input fields: 'Old Password', 'New Password', and 'Re-Type New Password'. Below these fields is a green 'Change Password' button. The page also shows the user's profile 'shruti vts' and the date 'Wednesday, 04 June 2025'. The footer includes a copyright notice: 'Copyright © 2012- 2025 Wokontech IT Solution All Rights Reserved.' and a status indicator 'Online'.

Employee Timesheet :

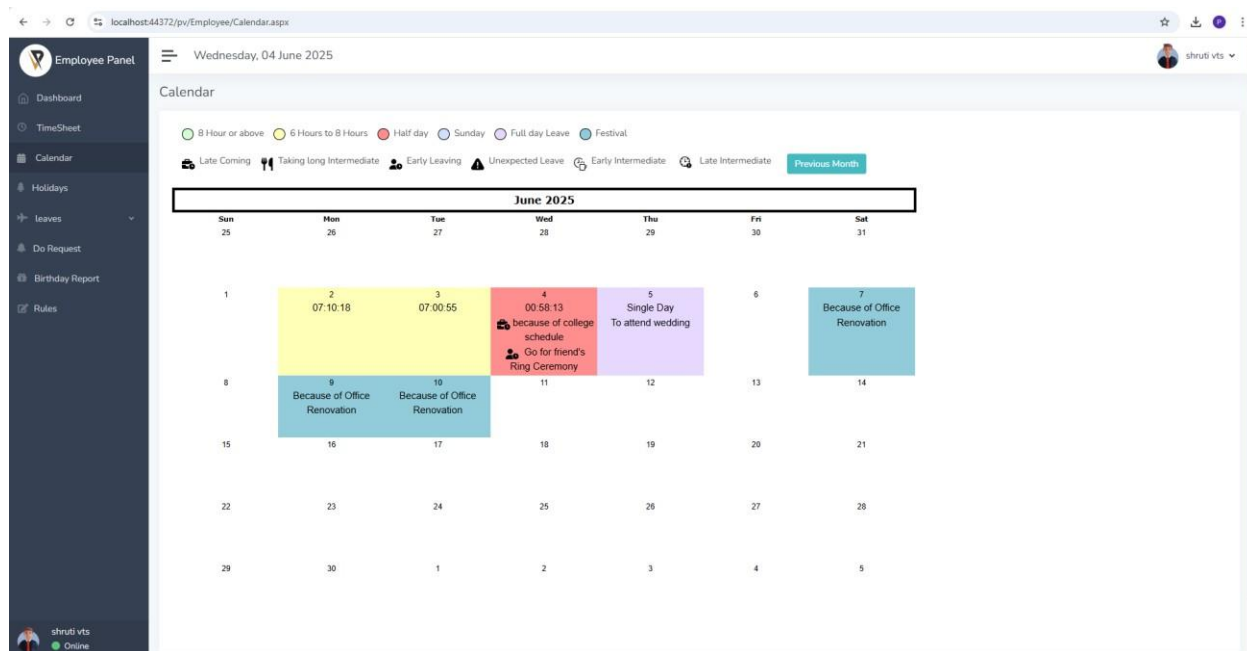

Here, all employees have to record their start and end times, as well as their lunch breaks. Additionally, if an employee is late to work or leaves early, they will be asked to provide a reason for their irregularity. Employee can also send time change request.

The screenshot shows the 'TimeSheet' page in the Employee Panel. The page features a digital clock displaying '12:15:30 PM' and four buttons: 'In Time', 'Intermediate Start', 'Intermediate End', and 'Out Time'. Below these is a table titled 'TimeSheet Details' with columns: Date, Entry Time, Intermediate Start, Intermediate End, Exit Time, Worked Hours, and Action. The table contains data for dates from 04-06-2025 to 26-05-2025. The 'Worked Hours' column shows values like '07:00:00', '07:10:00', '06:42:00', '06:00:00', '06:30:00', '06:58:00', and '06:00:00'. The 'Action' column contains edit icons. The page also shows the user's profile 'shruti vts' and the date 'Wednesday, 04 June 2025'. The footer includes a copyright notice: 'Copyright © 2012- 2025 Wokontech IT Solution All Rights Reserved.' and a status indicator 'Online'.

Employee Data Calendar of One Month :

Here on Employee data calendar admin can see timesheet details and irregularities reasons for any selected month of any employee data on single click of dropdown selection. Along with it, it can also create the report for that month.

The screenshot shows the 'Employee Calendar' interface for February 2023. The interface includes a sidebar with navigation options like Dashboard, TimeSheet, Calendar, and Employees. The main area displays a calendar grid for February 2023, with dates 1 through 28. Each date cell contains a time range (e.g., 08:00:18) and a color-coded status (green for 8 hours or above, yellow for 6 hours to 8 hours, red for half day, and blue for Sunday). A legend at the top explains these colors. To the right of the calendar, a 'Work detail of prayag paneliya' table provides summary statistics.

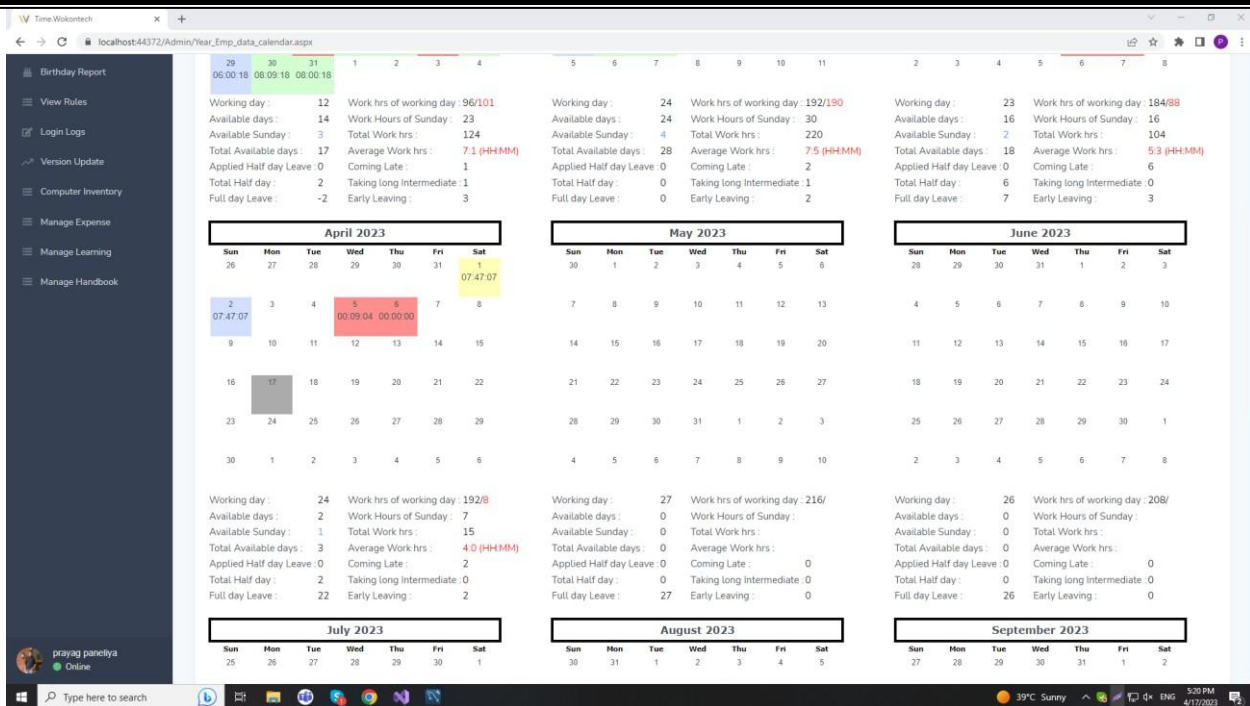

Working day :	24
Available days :	24
Available Sunday :	4
Total Available days :	28
Applied Half day Leave :	0
Total Half day :	0
Full day Leave :	0
Work Hours of working day :	192/190
Work Hours of Sunday :	30
Total Work Hours :	220
Average Work Hours :	7.5 (HH:MM)
Coming Late :	2
Taking long Intermediate :	1
Early Leaving :	2

Employee Data Calendar of One Year :

Here on Employee data calendar admin can see timesheet details and irregularities reasons for any selected Year of any employee data on single click of dropdown selection. Along with it, it can also create the report for each month of that year.

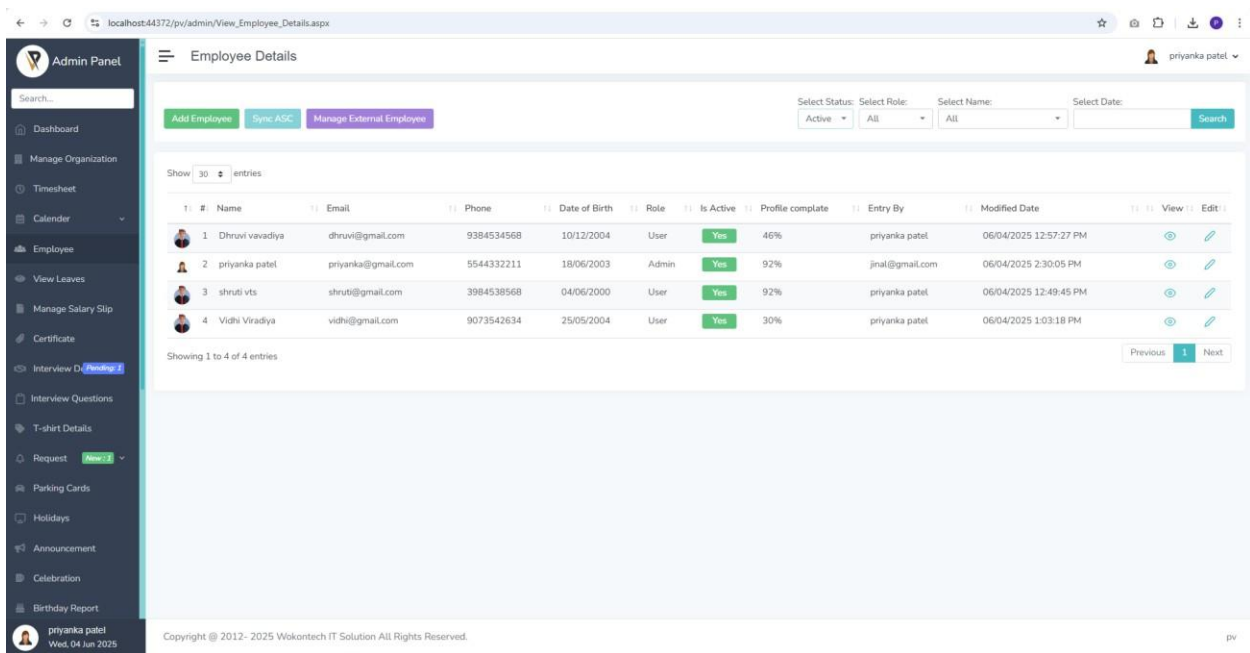

The screenshot shows the 'Employee Calendar' interface for the year 2023. The interface includes a sidebar with navigation options like Dashboard, TimeSheet, Calendar, and Employees. The main area displays a summary table for employee prayag paneliya, followed by three monthly calendar grids for January 2023, February 2023, and March 2023. Each calendar grid shows dates and time ranges, with a color-coded status (green for 8 hours or above, yellow for 6 hours to 8 hours, red for half day, and blue for Sunday). A legend at the top explains these colors.

Working day :	293
Available days :	56
Available Sunday :	10
Total Available days :	66
Applied Half day Leave :	0
Total Half day :	2
Full day Leave :	237
Monthly Average Work day :	4
Work hrs of working day :	2344/484
Work Hours of Sunday :	77
Total Work hrs :	561
Average Work hrs :	8.3 (HH:MM)
Coming Late :	11
Taking long Intermediate :	2
Early Leaving :	10

Manage Employees :

In manage employee, it shows employee list, and with also can view and update employee details.admin can search and filter employee list by status,role and date.

Add Employee :

Through this Employee Registration Form, only the admin has the authority to create employee accounts and manage their details. The admin can also record each employee's entry time, exit time, total working hours, and assign specific roles.

Computer Inventory Module :

Inventory Quick View :

The screenshot shows the 'Inventory Quick View' dashboard. The left sidebar contains a menu with options like Holidays, Announcement, Celebration, Birthday Report, Manage Handbook, View Rules, Login Logs, Computer Inventory, Inventory Quick View, Manage Category, Manage Inventory, Assign Item, Reports, Manage Budget, Manage Expense, View Activity Logs, Version Update, and Setting. The main content area displays a 'Dashboard' with various widgets: 'Total Stock' (Total In Use, Total Trash), '1 Stock', '1 In Use', '1 Trash', '1 Total Cpu', '0 Total Laptop', '0 Computer Parts', '0 Peripheral Device', '0 Monitor', and '0 TV'. Below these are two tables: 'Computer Parts' and 'Peripheral Device', both showing 'Sub Category' and 'Total Stock' columns. The 'Computer Parts' table has data for 'cpu' and 'mouse', both with a total stock of 0. The 'Peripheral Device' table shows 'No Data!!!'. The footer includes a user profile for 'priyanka patel' and a copyright notice for Wokontech IT Solution.

Manage Inventory Category :

The screenshot shows the 'Manage Device SubCategory' page. The left sidebar contains a menu with options like Admin Panel, Dashboard, Manage Organization, Timesheet, Calender, Employee, View Leaves, Manage Salary Slip, Certificate, Interview Details, Interview Questions, T-shirt Details, Request, Parking Cards, Holidays, Announcement, Celebration, and Birthday Report. The main content area displays a form for adding a new subcategory, with fields for 'Category' (Select), 'Add Subcategory' (Enter a Sub category), and 'Add Category' (Add Category). Below the form is a table showing the list of subcategories. The table has columns for #, Category, SubCategory, Entry By, Entry Date, Modified By, Modified Date, and Action. The table contains two entries: 1. Computer Parts, mouse, priyanka patel, 06/05/2025, and 2. Computer Parts, cpu, priyanka patel, 06/05/2025. The footer includes a user profile for 'priyanka patel' and a copyright notice for Wokontech IT Solution.

Setting :

Manage Department :

It stores the working department of the company

The screenshot shows the 'Manage Department' page of a web application. The browser address bar displays 'localhost:44372/pv/Admin/Manage_web_Department.aspx'. The page features a dark sidebar on the left with the 'Admin Panel' logo and a search bar. The sidebar menu includes options like Dashboard, Manage Organization, Timesheet, Calendar, Employee, View Leaves, Manage Salary Slip, Certificate, Interview Details, Interview Questions, T-shirt Details, Request, Parking Cards, Holidays, Announcement, Celebration, and Birthday Report. The main content area is titled 'Manage Department' and includes a user profile for 'priyanka patel'. Below the title is a form to 'Add Work Department*' with a text input for 'Enter a category' and 'Submit' and 'Cancel' buttons. A table below the form displays department entries with columns for #, Department name, Entry By, Entry Date, Modified By, Modified Date, and Action. The table shows four entries: Web Development, App Development, Data Administration, and Marketing, all created by 'priyanka patel' on 06/04/2025. A pagination bar at the bottom of the table indicates 'Showing 1 to 4 of 4 entries' with 'Previous' and 'Next' buttons.

#	Department name	Entry By	Entry Date	Modified By	Modified Date	Action
1	Web Development	priyanka patel	06/04/2025 11:04:35 AM	priyanka patel	06/04/2025 4:56:58 PM	Edit Delete
2	App Development	priyanka patel	06/04/2025 11:04:43 AM			Edit Delete
3	Data Administration	priyanka patel	06/04/2025 11:04:57 AM	priyanka patel	06/04/2025 4:56:55 PM	Edit Delete
4	Marketing	priyanka patel	06/04/2025 11:05:07 AM			Edit Delete

Manage Skills :

This module is used to manage skills required in company.

The screenshot shows the 'Manage Skill' page of the same web application. The browser address bar displays 'localhost:44372/pv/Admin/Manage_Skill.aspx'. The sidebar is identical to the previous screenshot. The main content area is titled 'Manage Skill' and includes a user profile for 'priyanka patel'. Below the title is an 'Add Skill' button and a 'Select skill' dropdown menu. A table below displays skill entries with columns for #, Skill Name, Entry By, Entry Date, Modify By, Modify Date, and Action. The table shows five entries: react.js, asp.net, java, data analysis, and android, all created by 'priyanka patel' on 06/04/2025. A pagination bar at the bottom of the table indicates 'Showing 1 to 5 of 5 entries' with 'Previous' and 'Next' buttons.

#	Skill Name	Entry By	Entry Date	Modify By	Modify Date	Action
1	react.js	priyanka patel	06/04/2025 11:05:30 AM			Edit Delete
2	asp.net	priyanka patel	06/04/2025 11:05:45 AM			Edit Delete
3	java	priyanka patel	06/04/2025 11:05:52 AM	priyanka patel	06/04/2025 4:58:00 PM	Edit Delete
4	data analysis	priyanka patel	06/04/2025 11:06:00 AM			Edit Delete
5	android	priyanka patel	06/04/2025 11:06:10 AM			Edit Delete

Manage Work Position :

Used to manage all available work positions in company.

The screenshot shows the 'Manage Work Position' interface. On the left is a dark sidebar with an 'Admin Panel' header and a search bar. Below the search bar is a list of menu items: Dashboard, Manage Organization, Timesheet, Calendar, Employee, View Leaves, Manage Salary Slip, Certificate, Interview Details, Interview Questions, T-shirt Details, Request (highlighted with a green 'New' badge), Parking Cards, Holidays, Announcement, Celebration, and Birthday Report. The main content area is titled 'Work Position' and features a green 'Add Work Position' button. Below this is a table with columns: #, Skill Name, Entry By, Entry Date, Modified By, Modified Date, and Action. The table contains 5 entries. A 'Showing 1 to 5 of 5 entries' message is at the bottom of the table, along with 'Previous', '1', and 'Next' pagination links. The top right of the interface shows the user 'priyanka patel' and a 'Select work position' dropdown menu.

#	Skill Name	Entry By	Entry Date	Modified By	Modified Date	Action
1	Front end developer	priyanka patel	06/04/2025 11:06:26 AM			Edit Delete
2	Backend Developer	priyanka patel	06/04/2025 11:06:34 AM			Edit Delete
3	Android Developer	priyanka patel	06/04/2025 11:06:40 AM	priyanka patel	06/04/2025 4:59:12 PM	Edit Delete
4	Data analyst	priyanka patel	06/04/2025 11:06:53 AM			Edit Delete
5	HR	priyanka patel	06/04/2025 11:06:59 AM			Edit Delete

Manage HR :

Used to manage HR related details and HR in office.

The screenshot shows the 'Manage HR' interface. The left sidebar is similar to the previous one but includes additional items: Manage Handbook, View Rules, Login Logs, Computer Inventory, Manage Budget, and Manage Expense. The main content area is titled 'Manage HR' and has a green 'Add HR' button. Below the button is a table with columns: #, HR Name, Email Address, Contact Number, Creadted Date, Modified By, Modified Date, and Action. The table contains 2 entries. The bottom of the interface shows the user 'priyanka patel'.

#	HR Name	Email Address	Contact Number	Creadted Date	Modified By	Modified Date	Action
1	Aastha	Aastha@gmail.com	3845683456	06/04/2025 11:07:21 AM			Edit Delete

6.3 ARCHITECTURE DESIGN

A 3-tier application architecture is a modular client-server architecture that consists of three logical tiers: the presentation tier, the application tier, and the data tier. Each tier serves a specific purpose and can be managed independently of the others.

Presentation Tier (Web Layer)

The presentation tier, also known as the web layer, is responsible for handling user input and providing output to the user. This tier is typically the user interface (UI) of the application, and it communicates with the application tier to request data or perform actions.

Application Tier (Business Logic Layer)

The application tier, also known as the business logic layer, is responsible for handling the business logic of the application. This tier contains the application's core logic, including data processing, validation, and business rules. It communicates with the data tier to retrieve or update data and with the presentation tier to provide data or receive user input.

Data Tier (Data Storage)

The data tier is responsible for storing and retrieving data. This tier contains the database or data storage system that holds the application's data. The data tier communicates with the application tier to provide data or receive updates.

Key Benefits of 3-Tier Architecture

- **Modularity:**

Each tier can be developed, tested, and deployed independently of the others.

- **Scalability:**

Each tier can be scaled horizontally or vertically to handle increased load or traffic.

- **Flexibility:**

The 3-tier architecture allows for the use of different technologies and frameworks for each tier.

- **Security:**

The presentation tier and application tier can be separated from the data tier, providing an additional layer of security.

Example of a 3-Tier Architecture

- **Presentation Tier:** A web application built using HTML, CSS, and JavaScript.
- **Application Tier:** A .NET Core application that handles business logic and communicates with the data tier.
- **Data Tier:** A SQL Server Management database that stores and retrieves data.

List of Packages which are used for create project :

Here's a concise introduction to each package and its primary use:

- `Ajax Control Toolkit.18.1.1` -: A set of ASP.NET controls and extenders for adding AJAX functionality to web applications.
- `Ajax Control Toolkit.HtmlEditor.Sanitizer.20.1.0`: Provides sanitization for HTML content in the AJAX Control Toolkit's HtmlEditor.
- `Bouncy Castle.1.8.9`: A cryptography library for secure encryption, decryption, and key generation.
- `DocumentFormat.OpenXml.2.15.0`: For creating and manipulating OpenXML-based documents like Word, Excel, and PowerPoint.
- `DocumentFormat.OpenXml.Framework.3.0.1`: Provides foundational classes and utilities for working with OpenXML documents.
- `HtmlAgilityPack.1.11.71`: A library for parsing, modifying, and traversing HTML documents.
- `itext7.8.0.4`: A library for creating and manipulating PDF documents programmatically.
- `itext7.pdfhtml.5.0.4`: Adds support for converting HTML content to PDF using iText 7.
- `iTextSharp.5.5.13.1`: A .NET port of iText for creating and manipulating PDF files.
- `log4net.2.0.8` / `log4net.2.0.14`: A popular logging framework for .NET applications.
- `Newtonsoft.Json.12.0.3`: A widely used library for parsing, serializing, and deserializing JSON data.
- `OpenHtmlToPdf.1.12.0.0`: Converts HTML documents into PDF files.
- `ReCaptcha-AspNet.1.9.0`: A library for integrating Google reCAPTCHA in ASP.NET applications to prevent bots.

`RecaptchaNet.3.1.0`: Another library for implementing Google's reCAPTCHA in .NET applications.

7. TESTING

7.1 UNIT TESTING

- ✓ Unit testing concentrates on each unit of the software as implemented in the source code. Initially test focus on each module individually, ensuring that it function properly as a unit.
- ✓ This module examines the code (logic) of the program special data where prepared which when process made used of all modules of the program, there by testing them.
- ✓ The system analyst, in charge of the project was involved at this level of testing.
- ✓ The unit testing has done for the system include for the following case:
 - Testing procedure takes into consideration for all paths traversed during program executed on.
 - Inputting appropriate values in the forms test all path, which can lead to errors.
 - From open and close are checked for complete system.
 - All variable names were checked for all procedures used in programming.
 - Data types of the items are also checked. I.e. if numeric values is to be entered then only numeric values should be accepted by that field. If any other values entered than appropriate error messages will be displayed.

7.2. INTEGRATION TESTING

- ✓ In the integration testing the focus is on the design and construction of the complete software architecture. All modules must be assembled or integrated to from the complete software package. Integration testing addresses the issues associated with dual problems of the verification and program constructions.
- ✓ Here the programs looked at as black box and put though the motion of execution.
- ✓ After combining all the module, the following things are tested:
- ✓ Testing is done twice for checking new error encountered during errors correction.
- ✓ Check values displayed in second block referring the first block is also tested, means the sort details of the materials type must be displayed whenever needed other from modules.

Test Case ID	Module	Type	Page Name/ Sub Module	Description/Steps	Path	Test Input	Test Output
Case 1.1	Forget Password	Error	SuperAdmin/Login	Click to forgot password link to Open first Model box	SuperAdmin/SuperAdmin_Login -> Forget Password Link	Enter Email from not an Admin or Superadmin	Verify email and give an error Your not admin or superadmin
Case 2.1	Add Organization	Bug	SuperAdmin/InsertOrganization(backend)	uppercase suffix with white space allowed to store in database and because of that admin link is not properly generated also image path becomes unreachable		Enter Suffix as :Test infotech 123	In the database, it is stored with whitespace and uppercase letters, which prevents the admin link and image path from working properly
Case 3.1	Manage Inquiry	Bug	SuperAdmin/ManageInquiries	request status has not been changed to "Rejected" and is still marked as "Pending."			
Case 4.1	Login		SuperAdmin/SuperAdmin Login	Invalid Credentials Are not allowed		1.Invalid Username and Password 2. Organization admin/Employee Credentials	1. Invalid Credentials message 2. You are not allowed Message
Case 5.1 Case 5.2 Case 5.3	Manage Salary Slip	Bug	manage_salary_slip.aspx	Search not working for active/inactive Salary slip not downloading properly in PROD After updating the salary format, the GridView data does not refresh immediately	manage_salary_slip.aspx --> Action (Download) manage salary slip --> Add salary format. update inserted salary format		

	Case 5.4				Without any Salary format employee salary is not binding in preview and wokontech logo is displayed	manage_salary_slip.aspx --> Create Salary Slip		
	Case 6.1	Interview Details	Bug	view_interview_person_detail.aspx	Resume is not Opened for view	View_interview_Details.aspx --> Action(Edit) -->view_interview_person_detail.aspx -->View Resume		
	Case 6.2			View_interview_Details.aspx	Link should be navigate to organization specific Interview form	Interview Details --> Click For Interview Form		
	Case 7.1	Certificate	Error	assign_document.aspx	After assign document to user if you select another document from dropdown it generates error	Certificate-->Create Certificate-->Create document for user --> Assign& Print. Then select another document from dropdown		
	Case 7.2				If User First click on Assign&Print button then Document format is converted into HTML text and after that because of html text Mail is not sent	Certificate-->Create Certificate		
	Case 7.3			manage_document_format.aspx	HR Name Is not updated for specific Document	Certificate-->Manage Certificate		

8. FUTURE ENHANCEMENT

- ✓ **Learning Module** : Our plan is to introduce a Learning module for employees that will offer simple explanations and instructions for using company software and other learning materials, making it easier for new employees to understand.
- ✓ **Expense Management** : Our aim is to integrate an Expense management module that will provide us with a simplified analysis report of the company's expenditures.
- ✓ **Task Management** : We plan to incorporate a Task Management System that will allow us to manage task allocation and completion.
- ✓ **Automatic Screenshot Tracking Module** : This module is designed to monitor employee screen activity by capturing automatic screenshots at predefined time intervals. It allows the organization's admin to gain insights into employee engagement and task focus during working hours. The screenshots serve as a transparent and effective way to ensure productivity and accountability across the workforce.

9. GLOSSARY

UML (Unified Modelling Language):

- Standardised general-purpose modelling language in the field of object-oriented software engineering.

WWW (World Wide Web):

- A system of interlinked hypertext documents accessed via the internet.

HTTP (Hypertext Transfer Protocols):

- Set of rules for transferring files on World Wide Web.

MySQL (My Structured Query Language):

- Relational database management system that runs as a server providing multi-user access to number of databases.
